## DANISH MINISTER FOR ENVIRONMENT TROELS LUND POULSEN PRESENTS AWARD TO DAN MARINE

Mr. Herby Tse, director of Dan Marine, today received His Royal Highness Prince Henrik's Medal of Honor and the Danish Export Associations Diploma from the Danish Minister of Environment.

Dan Marine receives the award for their achievements in introducing and selling Danish marine equipment in China. The Danish Minister for Environment Mr. Troels Lund Poulsen presented the award at the annual exhibition Marinetec China in Shanghai.

"Since Dan Marine was established in 2005, the founders Mr. Herby Tse and Mr. Lawrence Wang have, due to prior experience from working with Danish companies, managed to combine the difficult task of operating locally on Chinese conditions and adapting Danish companies and products to this foreign market," said the Danish Minister of Environment Troels Lund Poulsen.

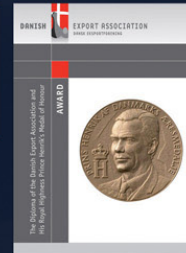

He has come to China in order to underline the focus that Danish marine industry has on fuel reduction and lowering the impact on the environment. Many of the Danish exhibitors take part in the development cooperation that is taking place under the name "Green Ship of the Future", where many projects to lower energy consumption and CO2 emissions are carried out.

The Danish marine industry has focused on the Chinese market supporting the development of the Chinese shipbuilding industry from the early beginning. Danish Marine Group has participated in Marintec China since the first exhibition back in 1979, where the exhibition was held in Shanghai Exhibition Centre. Therefore Denmark this year can celebrate 30 years of participating in Marintec China.

52 Danish companies are participating in the Marintec China 2009 exhibition in Shanghai running from Dec 1-4, 2009.
