Lease Hire Equipment

Proven oil spill technology
OFFSHORE SKIMMER SYSTEM

A complete standard equipment system to suit the offshore environment. The system includes; a DESMI HELIX 250 Brush Terminator skimmer with a 250kW diesel hydraulic power pack.

The hydraulic and discharge hoses are conveniently bound and supported by typical class steel and finished with marine grade paint system. Operations and control take place from a high visible and safe deployment. The powerful dual purpose onboard DOP 250 screw pump is capable of inflating two of the boom bulkhead chambers at a time. This reduces deployment time and can also be used in the recovery phase.

The powerful and universal DESMI 50kW power pack provides all the motive force for the skimmer and more. Note the simple floats that are supplied with the system.

The unique 360 degree reel, brush skimmer with powerful onboard DOP 250 screw pump, offers unparalleled service on the offshore environment. The system includes; a DESMI heavy duty, hydraulically operated reel is manufactured in a single point lift ensures quick and easy deployment.

The discharge hose and hydraulic hoses are neatly bound and supported by unique floats that are supplied with the system.

The powerful and universal DESMI 50kW power pack comes with an onboard blower and is capable of pumping 40 to 50 litres of water per minute. This equipment is used by all the major oil spill response operations around the world. For customers who do not intend on purchasing this type of equipment outright, want to free up working capital or just provide valuable tax deductions for their business, we also offer our customers to lease equipment.

What we offer with each Hire Package

DESMI design and manufacture an extensive range of systems to recover oil and chemicals from the marine and inland environment including industrial applications.

The products include skimmers, booms, storage tanks, power packs, pumps, dispersant systems, vessels and ancillary items.

This equipment is used by all the major oil spill response operations around the world. For customers who do not intend on purchasing this type of equipment outright, want to free up working capital or just provide valuable tax deductions for their business, we also offer our customers to lease equipment.

This lease package may typically include equipment, consultancy, training and maintenance during the whole lease term. At the end of the lease term we take back the equipment and the customer will have no further costs.

Please contact your local DESMI representative to provide a lease package that covers your demands for an oil spill recovery solution.

Each package comes with the following:

- Full Equipment Training
- Emergency Spares Kits
- 24/7 Technical Support
- Tool set
- PPE Equipment
- Quick Start Guide
- Easy to see inventory list
- Coloured coded storage spaces
- Equipment periodic maintenance
