HOSE REEL

PROVEN OIL SPILL TECHNOLOGY
HOSE REEL

DESMI Ro-Clean manufacture a complete range of custom-built hose reels for storing all types of hoses we offer. These are lightweight and ensure that the valuable hoses are stowed neatly to avoid potential damage.

The HOSE REELS from DESMI Ro-Clean are offered as standard in sea water resistant aluminium and are supplied as standard to be hand-operated. Various options are available including lifting points, ISO corners, brakes for the reels, etc, and, dependant on the number of hoses to be stored, up to 3 separate reels can be added to one single hose reel.

The reels are the ideal way to safely store valuable hoses neatly and compactly to avoid possible damage.

Advantages of HOSE REEL:

- Manufactured from sea water resistant aluminium as standard
- Forklift channels if required
- Fully customisable dependant on requirements

TECHNICAL DATA

Due to the fact that these hose reels are so customisable, please ask your sales representative for further information on hose reels, as the technical details will depend on the model required.
