DESMI
Make life flow

NAVIGATING TOWARDS A GREENER HORIZON – OUR ENVIRONMENTAL COMMITMENT

The call for a sustainable future resonates across industries, and the shipping sector is no exception. In alignment with the International Maritime Organization's (IMO) ambitious target to achieve carbon neutrality by 2050,

DESMI is fully committed to this environmental imperative. We are proud to introduce our new range of magnetically driven pumps, exactly engineered to meet the demands of next-generation fuels like Methanol.

Revolutionizing the Safe Handling of Alternative Fuels

The quest for greener alternatives to traditional fossil fuels is essential, yet it comes with its own set of challenges. New fuel types such as methanol are often toxic or hazardous, necessitating stringent isolation measures and double-walled piping systems.

As a pioneer in pumping solutions, we introduced magnetic coupling technology in the 1990s, and our cutting-edge design and continuous improvements have earned the trust and recognition of a wide-ranging customer base.

Our innovative, seal-less technology not only sets new industry standards for the safe pumping of hazardous liquids but also offers a solution that is:

Efficient
Reliable
Cost-effective

By eliminating the need for expensive auxiliary shaft seal flush systems and minimizing operational downtime for seal inspections or replacements, we provide a comprehensive solution that aligns with both safety and sustainability.

METHANOL PUMPS FOR ALL SYSTEMS

FUEL SUPPLY SYSTEM

Methanol Fuel Supply System:

- Vital for green vessel propulsion.
- Components designed for the marine environment.
- DESMI offers a full range of specialized pumps, including booster, draining, water heating, etc.

TRANSFER

Methanol Transfer:

- Essential for green fuel systems.
- DESMI's high-performance transfer pumps.
- Comprehensive range of specialized pumps available.

BUNKER

Methanol Bunkering:

- Crucial in the transition to Green Methanol.
- DESMI's magnetic-driven pumps ensure safety and reliability.
- Your partner for clean, alternative fuel bunkering.

The Easy Choice

Leak Prevention

Due to seal-less design, the mag-drive pump is the perfect match when handling new marine fuels, as they can be corrosive, toxic, or environmentally sensitive.

Reduced Friction

As mag-drive pumps do not have any mechanical seal, friction is eliminated, reducing wear and extending the lifespan of the pump

Improved Reliability

Fewer moving parts, reducing mechanical failure, leads to increased pump reliability and uptime

Low Maintenance

With fewer mechanical components, mag-drive pumps typically require less maintenance and downtime for servicing than mechanically driven pumps

Energy Efficiency

Mag-drive pumps can be designed with precise control over flow rates, which can lead to energy-savings when compared to constant-speed mechanically driven pumps

Enhanced Safety

Reduced risk of hazardous or toxic liquids escaping into environment

Quiet Operation

The absence of shaft seal and ball bearings ensures noise-reduced operation.

Environmental Benefits

More environmental-friendly operation due to reduction in leaks

Inside the Magnetically Driven DESMI Pump

Receive the Ultimate in Pumping Performance

Cutting-edge design methodologies and tools

Technical Specifications	
Nominal Diameter	25 to 125
Flow rate - 50 Hz	Up to 320 m³/h (1400 US gpm)
Flow rate - 60 Hz	Up to 385 m³/h (1700 US gpm)
Head	Up to 250 m (820 ft)
Pressure	Up to 25 bar
Temperature	Min. -40°C / Max. 120°C
Motor	Standard and Ex motor
Starting Method	VFD or direct online (DOL)
Viscosity Range	Min. 0.3 / Max. 300 cSt
ATEX approved	
Common Applications: Where no pumping medium leakage is allowed.	
Pumping of: Methanol, Ethanol, Hydrocarbons (fuels), Ammonia & Amine/Water Mixtures.	
Note: The pumps are designed for pumping liquids without solid/clogging particles. These could cause premature failure of the pump bearings and/or mag-drive.	

Ensuring Excellence with Global Certifications

At the heart of our commitment to quality and reliability, we proudly apply rigorous design assessments and secure internationally recognized approvals for our products.

Design Assessment by ABS: Our products undergo a meticulous Design Assessment by the American Bureau of Shipping (ABS), ensuring they meet the highest standards of safety and efficiency.

Type Approval by BV and CCS: We further enhance our credibility by obtaining Type Approval from both Bureau Veritas (BV) and China Classification Society (CCS). This guarantees our adherence to global quality benchmarks.

Product Certification - A Mark of Global Trust

Each pump we deliver comes with its own Product Certificate, a testament to its superior quality and compliance with international standards. This certificate is issued by one or more prestigious organizations:

Diverse Certification Bodies: Our pumps are certified by leading bodies such as ABS, BV, CCS, DNV, KR, and LR, and come with both ATEX, ISO 9001, ISO 14001, and ISO 45001 certificates.

IACS Member Societies: We collaborate with member societies of the International Association of Classification Societies (IACS), ensuring a broad and globally respected certification process.

In full compliance with the **IGF Code**, our products are designed to meet the rigorous safety standards for ships using gases or other low-flashpoint fuels, ensuring the highest level of safety and environmental sustainability in maritime operations.

With these certifications, we assure you of a product that is not only built to perform but also designed to lead in its class.

We exist to keep your business flowing

DESMI works closely with vessel owners, operators, and shipyards to deliver critical flow processes for diverse marine applications. Our pumps and supporting systems are trusted worldwide for dependability and the lowest total cost of ownership.

No matter which flow challenges you are facing, we can help you overcome them with class-leading equipment, solutions, and services designed specifically for your applications and environment, and with factories in China, India, the US, and Denmark, you benefit from our efficient global supply chain.

Founded in Denmark in 1834, we have provided the expertise, solutions, and aftermarket support our customers need for nearly two centuries. We help you operate more efficiently and reliably, enabling your ambitions for performance, compliance, and growth whilst helping you reduce your climate impact.

Together, we can make a difference, whatever the future holds. Because we, like you, are here to **make life flow**. For more information, visit **desmi.com**
